Professional Experience

Software Engineer

Kaz Software

May 2023 – present
Dhaka, Bangladesh

- Managed a team for the **Reganalytics** project, overseeing the development of key components.
- Developed key components of the **Reganalytics** application, including the tax-news briefing app (**Regbrief**), the **Company Data** tool with features like the **organizational chart** analysis and a **document builder**.
- Utilized the **yFiles** library in **Company Data** to create visual charts and controls for enhanced data analysis and organizational comprehension.
- Built web applications using **.NET Core** and **React**, focusing on adding new features, enhancing existing ones, and fixing issues to optimize efficiency and user experience.
- Identified and implemented necessary modifications to improve current programs.

Software Developer

iBOS, An AKIJ Company

January 2021 – April 2023
Dhaka, Bangladesh

AKIJ, Apon Wellbeing Ltd. and Madina Group are the **ERP** Systems on which I have collaborated. Additionally, I've developed a few **libraries** and **services**. Worked with some interesting and unique features for the ERP Systems including **Procurement**, **Inventory**, **Notification**, **Approval management system** etc.

My responsibilities are,

- Develop Web API using **.Net Core Framework** with **C#**
- Identifying areas for modification in existing programs and subsequently developing these modifications
- Adding new features, enhancements, and bug-fixes
- Test and deploy applications and systems
