Git, Docker, Jenkins

Work Experience

Software Engineer

Kaz Software ↗

May 2023 – present
Dhaka, Bangladesh

- Built scalable, high-performance web applications using **.NET Core** and **React**.
- Developed key features of the **Reganalytics** tax analytics platform, including **Regbrief** and **Company Data** modules.
- Collaborated with stakeholders, including product managers and UX/UI designers, to define requirements and enhance the software development process as a full-stack engineer.
- Manage the full lifecycle of software projects. This includes planning, executing, and monitoring projects from start to finish, as well as ensuring that projects meet requirements and deadlines.

Software Developer

AKIJ iBOS ↗

January 2021 – April 2023
Dhaka, Bangladesh

- Built and maintained ERP modules for **Procurement, Inventory and Approval Management**.
- Developed **RESTful APIs** using **.NET Core (C#)** for ERP integration.
- Implemented new features, resolved bugs, and optimized application performance.
- Collaborated with cross-functional teams to deliver client-specific solutions.

Education

Bachelor of Science - Computer Science and Engineering

East Delta University ↗

2018 – 2021

Chittagong, Bangladesh

Diploma in Engineering - Computer Technology

Chittagong Polytechnic Institute ↗

2013 – 2017

Chittagong, Bangladesh

Projects

RegAnalytics ↗

Software and services for regulatory compliance

C# | .Net 6 | WebApi | MSSQL | Typescript | React | Microservices

Akij ERP ↗

Enterprise Resource Planning software and services

C# | .Net 5 | WebApi | MSSQL | Microservices
